

### ■Exhibition Room 1

This room introduces the whole history of Suita, from primitive/ancient to contemporary periods with objects, models, and videos.

### ■Exhibition Room 2

This room features life-size kiln sites of ancient times, including those for *Sue* wares, which was abundantly produced from quality clay of the Senri Hill during the prehistoric Tumulus Age (about 3rd-7th century AD) and the remains of large-scale, government-run kilns that produced roof tiles for the *Naniwa* and *Heian* imperial palaces during the subsequent historic times.

### ■Special Exhibition Room

This room accommodates especial and feature exhibitions with different types of exhibition cases.

### ■Lobby

The exhibitions include a reconstruction of a bronze bell unearthed in Yamada that has been produced using an alloy of the same mixing ratio as the original, as well as a replica of a specially-appareled horse of ancient times that features a meticulous reproduction of a harness unearthed from the Ancient Tomb of Shin-Ashiya.

### ■Lecture Room

This room holds up to 120 people; it is equipped with audiovisual equipment including a large video projector.

### ■Video corner

Equipped with three monitors, this area offers our self-produced films that introduce some aspects of the history of Suita, as well as records concerning the protection of cultural properties and other materials.

### Map:

### Access:

- Buses from 'JR Suita Station Kita-Guchi (North Gate)' or 'Hankyu Suita Station' stop at either 'Shikinzan-Koen-Mae Bus Stop' or 'Satsukigaoka-Nishi (West) Bus Stop'. From there, it is about 4-7 minutes walk to the museum.
